

## Competence in Power Quality Solutions

# PQS

### PFC capacitors

- PhaseCap® Compact: Improved capacitor based on the successful PhaseCap® MKK design
- MKV capacitors: Enhanced design for highest performance requirements
- PhaseCap® Premium: The EPCOS premium MKK capacitor for many years – sold in millions
- PhiCap: High economy and EPCOS quality: The established capacitor to meet both requests

### Key components

- BR7000 power factor controller: For real 3-phase measuring and phase-specific PFC
- Thyristor modules: 10 to 200 kvar and 400 to 690 V AC; the EPCOS TSM range for dynamic PFC covers it all
- Capacitor contactors: Up to 100 kvar at 400 V AC with highest reliability and minimal space requirements
- Harmonic filters: Detuned and tuned passive filtering
